

Conference: Why Research in Internationalization Matters

16/17 May 2023 in Hamburg

Conference Programme

Evening Kick-off: Tuesday 16 May

Universität Hamburg, Edmund-Siemers-Allee 1, Ostflügel/East Annex, room 221

5-6 pm registration

6-8 pm (hybrid) Podium discussion “**Resilient Research in a Complex World Order**”

- Panel: Prof. **Maria Leptin**, President of the European Research Council, Prof. **Angela Ittel**, President of the Technische Universität Braunschweig, and Prof. **Hauke Heekeren**, President of Universität Hamburg
- Moderation: Prof. **Barbara Hans**

8-9:30 pm networking buffet

Conference day: Wednesday 17 May

Universität Hamburg, Edmund-Siemers-Allee 1, Ostflügel/East Annex, room 221

8:30-9 am registration

9-10:30 am Keynote inputs:

- Prof. **Rudolf Stichweh**, Forum Internationale Wissenschaft, Universität Bonn: “**The global system of science and the changing structures of international collaboration**”
- Prof. **Thomas Rigotti**, Leibniz-Institut für Resilienzforschung, Mainz: “**Resilient science: Crossing disciplinary and international boundaries**”
- Dr. **Max Paoli**, The World Academy of Sciences, Trieste: “**Global South, Global North: Building research together**”

10:30-11:00 am coffee break

11:00 am-1 pm: parallel workshops (room 122 & room 123)

- **Workshop 1: Do small things matter? On the role of individual research within international science cooperation**

In this workshop, we will discuss the specificity of individual research cooperation within the international research system. What are the advantages – and drawbacks – of conducting individual-based international research, as far as flexibility, scope, resilience, diversity, and sustainability are concerned? Which institutional conditions are needed so that individual international research can be successful? How have the basic conditions changed within the last few years, and what do these developments mean for the future? The workshop will also bring in the perspective of Institutes for Advanced Study as organizational structures to support individual research projects. A special focus will be placed on early career researchers' needs and viewpoints.

Input & panel: Dr. Anna Lisa Ahlers (Junge Akademie Alumna/ MPIWG); Prof. Sadia Bari (Universität Groningen/ Universität Hamburg/ DESY), Prof. Giovanni Galizia (Zukunftskolleg Konstanz), Dr. Christian Schäfer (DAAD), Prof. Dana Jalobeanu (HIAS/ Universität Bukarest), Prof. Monique Scheer (Universität Tübingen)

Moderation: Dr. Ulrike Dorf Müller (HIAS), Dr. Sonja Gräber-Magocsi (HIAS)

- **Workshop 2/3: What is the right size? On the role of networks within international science cooperation**

In this workshop, we will discuss the role and impact that international networks play in research, in individual research careers and for the institution as a whole. What are drivers and what are effective mechanisms for researchers for engaging in international collaboration? How do small research groups scale up successfully, and what are benefits or drawbacks of large-scale networks? What is the added-value of strategic networks with institutional partners as opposed to conducting research at an individual level – is there one? How have the pandemic and geopolitical events of the past several years affected research and research collaboration?

Input & panel: Prof. Jannis Androutsopoulos (Universität Hamburg, GW), Dr. Effrosyni Chelioti (Helmholtz-Gemeinschaft), Dr. Kathrin Knodel (DFG), Dr. Thore Posske (Universität Hamburg, MIN), Laura Wilton (The Royal Society), Victoria Reichl (European Liaison Office of the German Research Organisations)

Moderation: Dr. Hans Behringer (Universität Hamburg, CUI)

1-2 pm lunch break

2-3 pm plenary and concluding words
