

Session 2 - User presentations

Wednesday, June 11, 2025 10:30 AM (1h 30m)

- Jan Philipp Payonk + Lam Vien Che: Electroquasistatic Modelling of Biomedical Stimulation
- Enrico Zampa: Slip boundary conditions for the Stokes problem in rotational form
- Camilo Tello: Nitsche-based enforcement of Dirichlet boundary conditions for the Hodge Laplacian
- Miles Knöpfli: Modelling and simulation of a capacitive measuring instrument

Presenter: DETAILS, see
