Workshops

On Friday afternoon, we are offering three different workshops running simultaneously in small groups of no more than 15 participants. Places will be allocated on a first-come, first-served basis.

"Skills for future leaders" with Dr. Kathrin Bodewits from naturalscience.careers: What soft skills are important for future leaders? What should I consider when applying for leadership positions such as project manager? What relevant skills do I already possess? How can I gain leadership experience now?

"Own Your Voice: Empowering Communication in Academia” with Dr. Silke Oehrlein-Karpi: This workshop is designed for women in academia who want to strengthen their communication skills so they can engage confidently and on equal footing during negotiations, whether within a team, with supervisors, or with external partners. After all, only those who communicate clearly can be heard.

"Life Balance and Self-Care" with Dr. Faye Barth-Farkas from Scienza Coaching & Consulting GmbH: How can I balance multiple responsibilities and opportunities across different areas of my life? Which resources do I already use and where do I see potential to strengthen my individual practice of self-care? How can I prioritise my well-being while navigating demanding workloads, important decisions and career-defining milestones?
